

SYED IZHAAN ALI

SOFTWARE DEVELOPER

Karachi, Pakistan | syedizhaanali@gmail.com | 0312-2628706

SUMMARY

Results driven professional with experience in Machine Learning, Natural Language Processing, and data driven solution development. Skilled in building and evaluating predictive models, implementing NLP pipelines, developing REST APIs, and optimizing workflows using Python and modern ML frameworks.

EDUCATION

BS Computer Science

July 2022 - Present (7th Semester)

Iqra University

PROFESSIONAL EXPERIENCE

ML Intern, Pixeledge

April 2025 - July 2025

- Learned and applied Python for Data Analysis (Pandas, NumPy, OOP concepts).
- Performed Web Scraping using BeautifulSoup and Selenium to extract SEC data.
- Reviewed and improved code, focusing on extraction workflows and error handling.
- Implemented and evaluated Machine Learning Models :
 - Regression models (Linear, Lasso, Ridge) with visualization & evaluation metrics (RMSE, MSE).
 - Logistic Regression for HR data prediction.
- Explored Natural Language Processing (Stemming, Lemmatization, Tokenization, Named Entity Recognition, Transformer models).
- Built REST APIs for HR Retention system integration.
- Applied Unsupervised Learning (DBSCAN) for news clustering.

PERSONAL PROJECTS

AI Powered Bug Detector for Code

- Developing an AI tool to automatically detect and classify bugs in source code using machine learning and NLP.
- Analyzing code syntax, semantics, and patterns to identify errors, vulnerabilities, and inefficiencies.
- Training models on open source codebases to improve accuracy and performance.
- *Technologies:* Python, PyTorch, NLP, Static Code Analysis, Git, Docker, FastAPI.

AI powered Spam Email Detection System

- Developed a machine learning based spam email detection system capable of classifying incoming emails as spam or legitimate (ham) using natural language processing (NLP) techniques and supervised learning models.
- Implemented text preprocessing (tokenization, stopword removal, lemmatization) for email content.
- Trained and evaluated multiple machine learning models (e.g., Naive Bayes, Logistic Regression, and Random Forest) for classification.
- Built a Flask based web interface for users to input emails and instantly get spam/ham predictions.

CI/CD Pipeline

- Set up a CI/CD pipeline to automate web deployments seamlessly.
- Integrated GitHub for version control and streamlined code management.
- Configured deployments to Firebase, ensuring fast, reliable, and efficient delivery.

Expense Management Application

- A fullstack web application that helps users manage their financial records by tracking income and expenses.
- Features include user authentication, a dynamic dashboard with monthly filtering, and a Bootstrap based responsive design.
- Built using Node.js, Express.js, MongoDB, and Bootstrap.

Web Scraper

- Developed a web scraper using Python libraries (Beautiful Soup, JSON) to extract comprehensive data from websites and save it in JSON format.

Website Development

- Sam International WebSite (WordPress): I developed the WordPress website for SamInternational.online, leveraging the Kadence theme to create a user friendly and visually appealing platform tailored to the client's needs.
- Automobile Website (HTML CSS): I designed and developed an HTML website for an Automobile Service Company, focusing on a clean layout, responsive design, and user friendly navigation to enhance the customer experience.

TECHNICAL SKILLS

- **Programming:** Python, SQL, HTML, CSS, Node.js, Express.js.
- **Machine Learning:** Supervised & Unsupervised Learning, Transformers, Deep Learning, Model Evaluation.
- **Natural Language Processing:** NLTK.
- **Large Language Models (LLMs):** LLM, OpenAI, GPT, ChatGPT, LangChain, Ollama.
- **Deployment & APIs:** Flask, FastAPI, RESTful APIs.
- **Frameworks & Tools:** PyTorch, Tensorflow, Scikit learn, Hugging Face, Jupyter Notebook, Git.
- **Data Visualization:** Matplotlib, Seaborn.
- **Automation & Web Scraping:** Selenium, beautiful soup.
- **Cloud:** Firebase, AWS
- **Core Competencies:** Problem Solving, Critical Thinking, Communication, Time Management.

CERTIFICATION

- Introduction to Python | edX
- Beginning Amazon Web Services | 10 Pearl University

ADDITIONAL INFORMATION

- **Languages:**
 1. English | Full Professional Proficiency
 2. Urdu | Native or Bilingual Proficiency
